

STUDENT ACTIVITY HANDOUT

IFY STATISTICS | SEMESTER 1 - WEEK 4C

Revision and variable types before the Excel practical.

Bellerbys
Preparation for University Education

EXERCISE C0

Revision from Classes A and B

Slides 3-4

1. Which interval contains 40: $20 \leq x < 40$ or $40 \leq x < 60$? Why?

2. In a meal dataset, what does frequency count?

3. Which graph shows two numerical variables together?

EXERCISE C1

One row, one meal

Slides 6-7

The café records one row for each meal. Classify all six columns below.

Choose a type and give a short reason. You may use a type more than once.

Types: Identifier • Nominal • Ordinal • Discrete • Continuous

Variable	Examples	Type	Short reason
Meal ID	M001, M002		
Meal type	Noodles, Pasta		
Satisfaction	Fair, Good, Excellent		
Items	1, 2, 3		
Portion (g)	565.3, 541.7		
Leftover (g)	20, 40, 60		

Satisfaction options have this order: Poor, Fair, Good, Excellent.

For the type, think about what is counted, measured, named or ordered.
